## **Specialized Manufacturer** of Functional Adhesives

## **Company Overview**

**Company Name** 

**CEO** 

HANA CHEMICAL CO.,LTD

WON-CHAN CHUNG, JI-WOONG CHUNG

**Address** 

**Contact** 

25-19, Samsumun-gil, Jangan-myeon,
 Hwaseong-si, Gyeonggi-do, Republic of Korea

TEL (+82) 031-351-5010, FAX (+82) 031-351-5311

**Establishment** 

Website

1999. 01. 15

https://www.hanachemical.co.kr

Main Product
Main Clients

- Acrylic and Urethane, Rubber-based Adhesives
- 3M OEM, Samsung Electronics Vendor, Solar Film Manufacturer, etc.

## **Management Policy**

Company that grows with its customers, based on talent and technology

Technology Development

Contributes to the domestic production of functional adhesives through continuous investment in technology development and efforts to cultivate excellent talent.

**Customer Satisfaction** 

Maintains solid trust relationships through thorough quality control and fast customer response

## **Company History**

#### 2001

Development and sales expansion of adhesives for Safety, Solar, Film use Development of medical adhesives

#### 2008

Expansion of adhesive development for electronic material tapes (conductive tapes OCA, shading film, PCB process, etc.)

#### 2018

Development of tapes for semiconductor process completed Expansion of development for UV curable adhesives Expansion of development for ecofriendly adhesives

#### 1999

Company Establishment Development completed and localization achieved for adhesive for 3M double-sided Tape

#### 2004

Development and sales expansion of protective film adhesives (for protecting steel plates, prism sheets, anti-static adhesive for glass protection, etc.)

Patent certified

#### 2014

Sales of conductive Tape adhesive Development of adhesive for OCA completed Development of adhesive for shading film completed

Expansion of tape development for semiconductor process

#### 2023

Sales of tapes for semiconductor process Expansion of development for eco-friendly tape adhesives

Development of adhesive for flame-retardant tape

Expansion of functional chemical development such as binders, hot melts, adhesives, etc.

### **Business Areas**

# Various functional Acrylic Adhesives Urethane Adhesives for Protective Film and Film Lamination Rubber-based Adhesives

## **Organizational Chart**

Total	Laboratory	Production	Sales	Sales	Management Support
21	6	2	7	1	5

## **Facility Status**

Reactor	Count		
10-ton Reactor	1 ea		
5-ton Reactor	3 ea		
3-ton Reactor	5 ea
